

Wear Sleeve Overview

As we furnish wear sleeves with some of our standard oil seal product line, it naturally follows we could furnish separate production wear sleeves. Tobar does not have standard cataloged wear sleeve products, however we are able to provide high quality production wear sleeves.

The items shown on this page are examples of wear sleeves we now provide.

All we need are your specifications or if you need recommendations for specific applications, we will gladly provide for an initial quotation.

With Tobar as your supplier, you will be provided with lowest cost set up charges, combined with the hardness, grinding process, machine leads, metal type, surface finish, roundness, and performance to meet your specific needs.
